2025/26

Vision Priority:

Sustainability and Environment

Nurture agriculture and work towards a climate focused and sustainable environment with a focus on waste and recycle management.

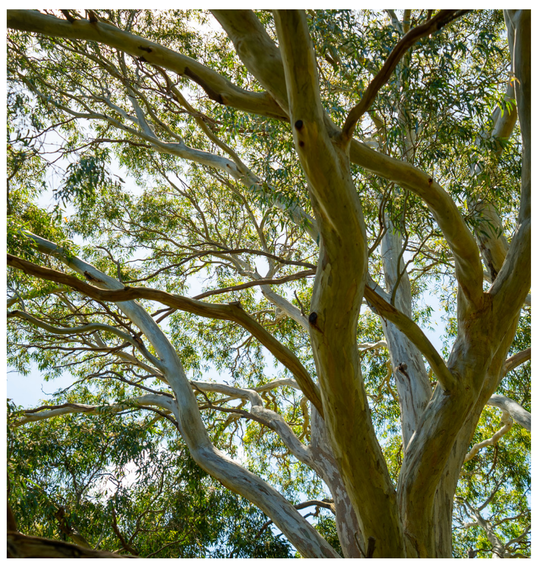

What the community told us

65%
of residents strongly agree that climate change needs to be addressed now.

56%
of residents strongly agree they have made changes to their home or lifestyle to help reduce climate change and its impacts.

Excellent
waste services

Excellent
programs, events and policy development to encourage sustainability, increase resilience and address climate change

Council is helping Wyndham adapt to climate change through the draft Resilient Wyndham Strategy by:

- Supporting Council's commitment to net zero emissions.
- Planning for climate resilience and future environmental challenges.
- Improving energy efficiency across Council operations.
- Working with community, businesses and governments to support a more sustainable future.

Helping Residents Live Sustainably

Council delivered and supported programs including:

- My Smart Garden workshops helping residents grow food, save water and reduce waste.
- Green Living Series education programs.
- Community education on sustainability, waste reduction, reuse, recycling and climate action.
- Practical support to help households reduce their environmental footprint.

Supporting Better Waste & Recycling

Services Available to the Community

Council provides:

- Kerbside garbage, recycling and FOGO collection
- Hard waste and green waste services
- Recycling drop-off hubs and community recycling events
- Transfer station access and tip voucher programs
- Waste and recycling bins in parks and public places
- Street sweeping, litter collection and dumped rubbish removal

Sustainability by the Numbers

42%
of Wyndham households have rooftop solar, top 5% of councils nationally for solar adoption.

107
solar systems installed across 90 Council sites.

20,600+
streetlights upgraded to energy-efficient LEDs, reducing emissions and operating costs.

More than 1,400
students participated in sustainability education programs

Waste & Recycling Priorities

- Reduce waste and promote recycling and composting rates
- Support a circular economy
- Reduce contamination through education
- Prevent illegal dumping through education and enforcement
- Maintain high-quality waste services while managing costs responsibly.
